

Food service grade electric pressure washer for incoming water temperatures of up to 180°F

Electric Powered | Direct Drive

HD special class – for strict hygiene requirements.

The Kärcher’s HD 2.3/14 C Ed Food can take the heat. It withstands incoming water of up to 180°F making it ideal for kitchen and food service applications. Its compact design and portability make it convenient for fast cleanups while its commercial-duty components make it tough enough for all cleaning jobs. Non-marking hose and wheels leave no traces behind; rugged 3-piston commercial axial pump ensures long service life; total trigger shutoff saves energy; and protective cover shields components from over-spray. This unit is ETL safety certified to rugged CSA and UL standards.

Technical Data and Equipment

HD 2.3/14 C Ed Food

- Water inlet temperature up to 180°F
- No fossil fuel emissions or fumes
- Ergonomic design
- Easy Press trigger gun
- ETL certified to UL and CSA standards

Technical Data		
GPM		2.3
PSI		1400
HP		3.2
Electrical		120V / 1ph
Amps		20
Pump		Kärcher Axial
Ship Weight	lbs.	68
Dimensions (L x W x H)	inches	15 x 14 x 37
Order No.		1.150-629.0

Easy press trigger gun

- Ergonomic design
- Soft grip for greater comfort

Automatic pressure cut-off

- For reduced energy and water consumption
- Switches off immediately when work is interrupted

Pressure adjustment

- Pressure adjustment knob located in front of the machine for precise cleaning control

Wheels and Hose

- Non-marking hose and wheels leave no traces behind

Ergonomic features

- Comfortable non-fatiguing trigger gun features "one-finger" operation.

Powerful and durable

- Pump is protected by a pressure switch and overflow valve.
- Built-in motor protection against voltage fluctuations and excessive temperatures.
- Patented motor/pump unit is integrated in a single housing, ensuring extra-efficient energy transfer.
- Pressure-controlled automatic shutdown system stops the motor and pump completely when the trigger gun is released, extending the life of key components.
- Protective cover made of high-impact materials shields key components from elements.
- Triple nozzle can be adjusted for 0° pencil jet, 25° fan spray, or 40° low-pressure chemical application.
- All compact models are ETL certified to rigid UL and CSA safety standards.

Smart features

- Adjustable downstream chemical injection system for precise detergent application.
- Compact and robust 3-piston axial pump features brass cylinder head and hardened steel pistons and valves.
- Non-marking hose, with integrated connections, swivels inside gun under full pressure to avoid tangles.
- Machines feature ground-fault circuit interrupters (GFCI) for operator safety.
- Infinitely variable adjustment of pressure and water flow allows optimum flexibility for different cleaning tasks.
- Stainless steel spray lance rotates 360° under pressure.

Outstanding mobility

- Light-weight upright construction with adjustable pull-out handle for ease of storage.
- Upright design for easy, ergonomic transport.
